

WP5 T2 Incubator: Discovery Pilot Kick Off Meeting

Date: 02/14/2019

Time: 10-11:30 AM CET

Attendees:

- Lukas (P.I.)
- Jule (Scrum Master)
- Leif (Mentor)
- Niels (Task lead)
- Davide (Service Owner eduGAIN services)

Meeting Notes

Background:

Recap from Leif based on RA21 perspective

- Informal agreement between GEANT, I2, NISO and other to form collab on global discovery infra at minimal IdP persistence. Split between persistence and GUI. A meeting will take place tomorrow in Vienna mainly about branding (especially domain name, hosting). An evaluation of criteria for domain name is performed by an external company.
- Open Questions: Feedback via Klaas
- In parallel to this: Work in Github repo THISS (the identity selector software/service), mostly done, represents a frontend for searching

How to continue?

Twofold strategy:

- Move eduTEAMS DS to eduGAIN service task and thus to a productive service
 - Implementation guidance: get guidance and feedback from larger mesh feds. Strategy: find feds with most SPs. get them to support and Move the current service to production in eduGAIN task
 - Figure out together with Davides task what is missing to become a productive service, e.g. in terms of documents, OLAs, etc -> Investigate gaps in PLM based on the current Deploy and how does it really work?
- Identify what RA21 software can do and figure out what features are missing
 - How does it impact our users, perform gap analysis

- How to use the API and build a disco service out of that. Consortium will build: persistence service, generic gui
- Technically deploy RA21 software and test it
- Leif to keep us updated on RA21 branding discussion and where to put IDP persistence service
- Potential activities how it will work with VOs?

Action Items

@Jule: Create Discovery Pilot mailinglist, include Klaas W.

→ done: discovery-pilot-incubator@lists.geant.org

@Lukas: Create first version of product backlog in Trello which will then be discussed at the F2F meeting in Utrecht to perform sprint planning

@Lukas,Niels: fill in template of this activity:

<https://wiki.geant.org/display/gn43wp5/Discovery+Pilot>

@Davide: Coordinate with Nebojsa
