AARC

Authentication and Authorisation for Research and Collaboration

A second phase of the AARC project (AARC2) started in May 2017. It is expanding and deploying the AARC Blueprint Architecture and policy frameworks, working closely with research collaborations so they can build interoperable authentication and authorisation infrastructures (AAIs).

6 Guidelines
https://wiki.geant.org/x/o4AuBg

To help research infrastructures deploy AARC-compliant AAIs and policy best practices

5 Deliverables
https://wiki.geant.org/x/3QZwBg

On GDPR guidance, pilot results, a policy toolkit, service provider authorisation models, and R&E communities' requirements

9 Pilots
https://wiki.geant.org/x/lYq7Ag

To help R&E communities to deploy AARC-compliant AAIs that meet their use-cases

4 Training Events
https://aarc-project.eu/training

A set of tools, materials and face-to-face and online courses aimed at R&E communities and service providers

Engagement

https://aarc-project.eu/about/aegis

AEGIS

AARC Engagement Group for Infrastructures is for R&E communities that operate an AARC-compliant AAI

Impact

- R&E communities now able to deploy interoperable AAI by following the AARC Blueprint Architecture and policy models

- Consultancy and support for R&E communities to guide them during the implementation phase

- Training where needed

Who is deploying the AARC Blueprint?
