# ORCID IdP as a last resort - demo#6

GN4-3 T&I incubator Team as  
Presented on 12. November 2019

---

---

---

## In a nutshell

This pilot aims to bring ORCID into the IDhub/eduTEAMS (SaToSa) solution. It investigates the (technical) improvements needed to eduTEAMS. At the same time it investigates the requirements to be able to offer such a service with formal support from ORCID.

---

---

# Goals

- bring ORCID-to-SAML closer to production
    - with formal support from ORCID
  - better define attribute profile and use cases
  - investigate the (technical) improvements needed to better scale the IDhub solution
  - begin a dialog with the service activities to make the pilot move towards a full service offering under the GEANT umbrella.
-

---

# Progress

- Done
    - Developer T&I training
      - SAML, SATOSA, OIDC
    - ORCID member sandbox credentials received
    - ORCID member API credentials received
    - Production parameters acquired
    - Account recovery: requirement engineering
    - Attribute release: requirements and proof of concept
    - bug fixes for SATOSA
-

## ORCID in context of eduTEAMS

---

# Screencast Time!

<https://drive.google.com/file/d/1eJgEUb2NZ6oJhnF8G9onhOxrIPAkHnFj/view>

---

---

---

# Leftover

- UX improvements
  - SIRTIFI, RAF profile for the IdP side
  - High Availability
-

---

**Thank you!**
